Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-32 of U.S. Patent No. 6,618,668. Although the conflicting claims are not identical, they are not patentably distinct from each other because the mere fact of reciting the claimed limitations in "means for" functions as opposed to "step of" functions as recited in the above mentioned patent does not make the claims of the present application patentably distinct over the claims of the '668 patent. In addition, it is noted that the "mapping application module" of the '668 patent performs of the functions of the "means for receiving...", "means for translating ...", and "means for storing ..." of the present application, while the "data manager" of the '668 patent performs the functions of the "means for monitoring", "means for comparing", "means for determining", "means for causing" of the present application. Additionally, the mere recitation of the "steps of" of the '668 patent (e.g., claims 16, 26) into "means for" in the present application does not make the claims of the present application patentably distinct over the claims of the '668 patent

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 7-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Moore [6,377,210]

Moore disclose an automatic mobile object locator apparatus and method, wherein a map is displayed to a party, i.e., user, whereby the use is enabled to identify one or more locations or one or more regions on the map, and wherein the monitoring travel data associated with travel status of a mobile vehicle is monitored. See figures 10-15, 17-18. According to Moore, a communication is established to a party communications device that is remote from the notification computer system based upon the travel status in relation to the identified locations or regions, wherein the map is provided to the party over the Internet (figures 6-9, 16). See also columns 7-9.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
